Additions to the Capture toolbar

Tool	Name	Description
	Simulate	Opens a Simulate session for the design. Equivalent to the Simulate command on the Tools menu.
	Compile	Creates an optimized, gate-level netlist from the design. Equivalent to the Compile command on the Tools menu.
	Build	Builds a timing-annotated netlist for the design using the appropriate vendor fitter or place-and-route tool. Equivalent to the Build command on the Tools menu.

The Simulate toolbar

Tool	Name	Description
	New	Creates a new document based on the active document. Similar to the New command on the File menu.
	Open	Opens an existing document based on the active document. Similar to the Open command on the File menu.
	Save	Saves the active schematic page or part. Equivalent to the Save command on the File menu.
	Print	Prints the active schematic page or part. Equivalent to the Print command on the File menu.
	Cut	Removes the selected object and places it on the Clipboard. Equivalent to the Cut command on the Edit menu.
	Copy	Copies the selected object to the Clipboard. Equivalent to the Copy command on the Edit menu.
	Paste	Pastes the contents of the Clipboard at the cursor. Equivalent to the Paste command on the Edit menu.
	Undo	Undoes the last command performed. Equivalent to the Undo command on the Edit menu.
	Redo	Redoes the last command performed. Equivalent to the Redo command on the Edit menu.
	Zoom in	Zooms in to present a closer, enlarged view. Equivalent to the In command on the Zoom menu (on the View menu).
	Zoom out	Zooms out to present more of your document. Equivalent to the Out command on the Zoom menu (on the View menu).

The Simulate toolbar (continued)

	Edit stimulus	Opens the Interactive Stimulus dialog box. Equivalent to the Edit Interactive command on the Stimulus menu.
	Edit traces	Opens the Select Signals dialog box. Equivalent to the Edit Signal Traces command on the Trace menu.
	Run	Runs the simulation. Equivalent to the Run command on the Simulate menu.
	Stop	Stops the simulation. Equivalent to the Stop command on the Simulate menu.
	Continue	Continues the simulation. Equivalent to the Continue command on the Simulate menu.
	Step	Steps through the simulation. Equivalent to the Step command on the Simulate menu.
	Insert/ remove breakpoint	Toggles the insertion or deletion of breakpoints. Equivalent to inserting or deleting a breakpoint using the Add or Remove buttons in the Break on Line dialog box (accessed by choosing the Break on Line command on the Simulate menu).
	Restart	Restarts the simulation. Equivalent to the Restart command on the Simulate menu.
	Reload	Reloads the project. Equivalent to the Reload Project command on the Simulate menu.
	Help topics	Displays the online help. Equivalent to the Help Topics command on the Help menu.
